Rocketober

Beautiful weather, people mostly did a great job following Covid rules, really good launch all around.

Motors: 40 Friday, 116 Saturday, 48 Sunday, most popular motors were H, I, and F, in that order. Not much low power. 4 M motors were the largest motors flown, including Tim Ryerse's L3.

Kelly Bruland set new TRA altitude records with an F10 to 7,989' and an I216 to 15,656'!

Neal Forrester flew a cast iron pig payload in "when pigs fly", his heaviest rocket to date at 49 lbs on the pad. Flew to 6,880'.

Can we do anything about aircraft? Not really, just stop flying until they are gone.

Garden Home

Launch this weekend (Nov. 7th) assuming no last minute Covid regulation changes cancel it. We will confirm one more time with the parks department.

1-4pm at Garden Home Park

Other Business

George Rachor ran an outreach launch for a scout group and it went really well. Lots of Alpha III's

Tri Cities: planning to launch this Saturday now that Covid restrictions have been lessened in that area.

Trailer Party: Robert needs to talk to the neighbor that normally hosts, not sure on feasibility during Covid. Sooner the better, so he will try to sort it out soon.

Covid: New record number of new cases today (805), many cases in Multnomah, Washington, and Deschutes counties.
