Treasurer's Report

To be sent out later this week.

LDRS40 Work

Planning to work on sage clearing in November. Schedule is dependent on how wild fire season goes. Contact Dave Armstrong if you have any specific questions.

Sod Blaster

Gus & Priscilla Robinson are already there along with Steve Ehrlich. Report is that the flight line is ready and the smoke isn't bad at all! Expecting a good turnout from OROC.

Fillible's Folly

Launch is a go as of now. The field this year is the one south of W. Perrydale Rd, near Kurtz Rd. (across from the grain silos). Show up on Friday to help setup!

We will try to do some LCO / RSO training at this launch. Even just come and observe if you get a chance and want to start learning the ropes. We are planning to do more formal training prior to LDRS next year.

Brian Clark will send out a volunteer sign-up sheet again, please sign up for RSO (NAR L2+) or LCO if you can!

Sunriver Nature Center will be there with his trailer of kits, motors, and everything else.

We may use this launch to test our LDRS range setup as well as some new audio equipment we are hoping to use at LDRS as well.

LDRS

Website development is coming along, targeting a launch of end of September.

Sage clearing plans are in the works, stay tuned to the email list for details.

Hotel deals have been negotiated at The Riverhouse and Shilo Inns. Links will be on the website when it goes live.

New pads and pad boxes are being acquired. The range at LDRS will have two high power pad areas with 8 pads each, and the launch will have ~45 pads total.

Some planning efforts still need volunteers. Email the bod if you would like to inquire about helping out.

New Business

Erik McKee and Jim Wilkerson are putting together an information / build day with PSU in the Park blocks on Sunday, Oct. 3rd. Reach out to the OROC BOD if you would be able to join and help out.

Meeting Adjourned at 8:24pm.
